Esprit Head Office Benelux

The Esprit Head Office Benelux is a sustainable mixed-use building, consisting of three layers of showroom spaces and offices. The landscape is lifted and extended into the building, creating a welcoming and transparent entrance and restaurant area. An oblique-shaped volume forms the superstructure, with windows carved in lopsided shapes. Aluminum plating forms a filigree, free formed pattern in relief. Large boulders carry the volume and anchor the building in the landscape. The interior is dominated by a large monumental staircase connecting the three floors, leading to the patio on the top floor. Voids and skylights bring transparency and openness to the building, reflecting the philosophy of the company.
