

## Schuurman Headquarters

The headquarters of the Schuurman Group, an electro-technical firm, is situated in a prime location alongside the A9 highway. To profit from the qualities of the location, the building is designed as a sculptural free-standing object; conceptually the volume has uplifted corners with huge glass sheets, to accentuate the special functions of the program. The strong lines of the exterior give the building a distinctive expression and allow the landscape to flow through the building. On the top floor a patio-garden brings light deep into the building, providing a visual and physical link between the offices and the warehouse-area. The newest sustainable measures have been incorporated, forming a green environment.
